

Field Pack

Florentino®

- NEW! Florentino® is a bunched cauliflower type. As a hybrid variety, it is cultivated in the field to maximize length, and to deliver a mild flavor with a consistently delicate, tender texture.
- Florentino has lengthy, slender stalks that are topped by clusters of creamy golden rosy, slightly opened buds. As it grows in the field, the sunlight affects the color of the beads. Typically, the rosier color implies a sweeter profile.

- Offered in banded bunches with a UPC and recipe on the tag. Additional recipes are available on qvproduce.com.
- Ships year-round from Salinas, CA and Yuma, AZ.
- Available in iceless packs.
